9- look at the rules of using data, which are based on the connections found or on a sample set of data.

1. Cloud computing
2. Expert systems
3. Data training
4. Neural networks

10- Which of the following statements is true?

1. Data mining is a process of analyzing unknown patterns in data.
2. Artificial intelligence is commonly used in data mining.
3. In data mining, patterns found while analyzing data are used for further analyzing the data.
4. Cloud computing is commonly used in data mining.

11- Linus used the programming tools developed by Richard Stallman's Free Software Foundation, an organization of volunteers dedicated to fulfilling Stallman's ideal of making good software that anyone could use without paying.

1. LISP
2. PROLOG
3. GNU
4. JAVA

12- Which of the following words is a synonym for the word immense?

1. minuscule
2. minute
3. massive
4. tiny

13- Which of the following statements is true?

1. Fewer people are using computers because computer functions are becoming integrated into other electronic devices.
2. Intelligent agents will make computers seem more like humans.
3. Keyboards and mice will soon not be required for using personal computers.
4. Speech recognition is likely to completely replace other input devices.

14- The term "TTS" means:

1. Software assistant that performs tasks such as retrieving and delivering information and automating repetitive tasks.
2. A system that allows a user to interact with a computer using a combination of inputs such as speech recognition, hand writing recognition, text to speech and etc.
3. Graphical user interface.
4. Text to speech.
